EDUCATION

Bachelor of Technology, ECE, <i>Bharati Vidyapeeth College of Engineering, New Delhi</i> CGPA-8.59	09/2023 – 06/2027 New Delhi
CBSE XII, Shri Baba Mastnath Public School 84.8%	2021 – 2022 Rohtak, Haryana
CBSE X, Shri Baba Mastnath Public School 89.6%	2019 – 2020 Rohtak, Haryana

PROFESSIONAL EXPERIENCE

Bharati Vidhyapeeth College of Engineering, Summer Trainee AI/ML Summer Training – Gained hands-on experience in machine learning algorithms, data preprocessing, and model evaluation using Python libraries (NumPy, Pandas, Scikit-learn, TensorFlow).	06/2025 – 07/2025 New Delhi
---	-------------------------------

SKILLS

Programming Languages: Java, Python, C, C++, Javascript.	AI & ML Tools: XGBoost, Scikit-learn, Pandas, NumPy, Speech to-Text & Text-to-Speech APIs.	Development: Html, CSS, Javascript, Reactjs, Nodejs, Expressjs, MongoDB, SQL, Socket.IO	Version Control: Git, GitHub, VS Code.

PROJECTS

CoDrift 	04/2026 – 05/2026
• Overview: Real-time collaborative coding platform that enables teams to work together on projects with synchronized editing, live cursors, multi-file workspaces, and integrated communication features. • Key Features: Real-time multi-user code collaboration, live cursor synchronization, dynamic coding rooms, multi-file project management, code execution support, and voice communication channels. • Technologies: ReactJS, Vite, Monaco Editor, Yjs, WebSocket, Node.js, Docker, Tailwind CSS. • Outcome: Developed a scalable collaborative development environment that enhances team productivity through seamless real-time coding and communication.	
RepolQ 	04/2026
• Overview: Web-based AI-powered system that analyzes GitHub repositories to evaluate code quality, structure, and best practices using machine learning models. • Key Features: Repository analysis via GitHub URL, AI-generated summaries, code quality scoring, improvement suggestions, and interactive dashboard UI. • Technologies: ReactJS, Tailwind CSS, Node.js, Express.js, GitHub API, Gemini API. • Outcome: Developed a scalable and intelligent platform that provides automated insights into codebases to improve development quality and decision-making.	
Sentiment Analysis 	06/2025 – 07/2025
• Overview: Machine learning model to classify tweets and comments as positive or negative. • Key Features: Text preprocessing, TF-IDF vectorization, feature engineering, and Logistic Regression model training. • Tech Stack: Python, NLTK, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn. • Impact: Achieved 81% accuracy and established a strong ML baseline for sentiment classification tasks.	

POSITION OF RESPONSIBILITY

Design & Creative Head, GeeksforGeeks, BVCOE Leading the visual branding of the college technical society, designing promotional materials for events, managing a design team, and collaborating with other teams to deliver consistent and impactful visual communication.	08/2025 – Present
Design Executive, Enactus, BVCOE Created and managed visual content for events and social media, ensuring consistent branding and timely delivery of posters, banners, and promotional materials while collaborating with cross-functional teams.	08/2024 – Present
Design Editor, ECE Department Magazine - Odyssey 3.0 & 4.0	05/2025 – 05/2026
